Higher yields with positive net impact on operating profit

Operating profit after 100bps interest rate increase (EUR mn)

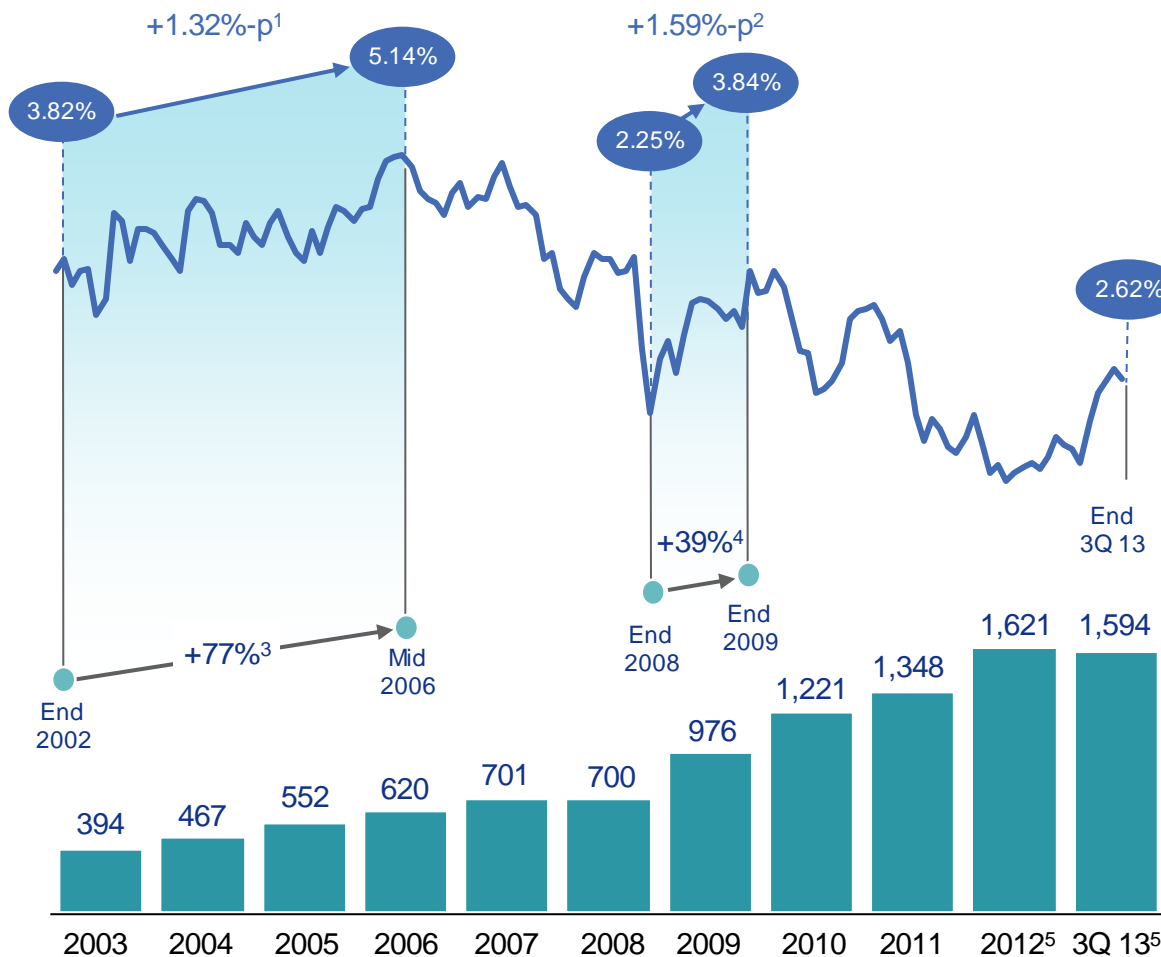

- P/C: Immediate substantial positive impact due to relatively short duration
- L/H: Positive effect of higher interest income mitigated by possible ZZR unwind
- AM: Higher yields offset lower asset levels
- Corporate: Negative impact of higher coupons and interest costs offset by higher interest income and lower pension costs

Disclaimer:

- Simplified assumptions
 - No impact on operational business
 - Unchanged risk appetite reg. reinvestments
 - L/H excl. impact on derivatives / DAC and trading liabilities (one-off)
 - Positive effects on MCEV / NBM excluded

PIMCO AuM grew even in times of increasing interest rates

Why resilience?

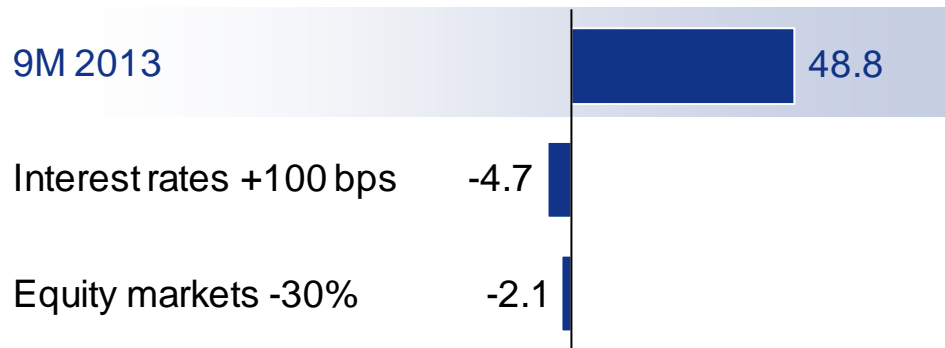

- Fixed income favored by regulation, income seeking investors (age 50+) or funds and ALM management
- Ongoing diversification into other asset classes and non-traditional products (now 65%) ...
- ... with higher revenue margins
- Growth opportunities in Europe / Asia
- Higher yields increase accumulated interest income
- Higher yields ultimately lead to more attractive F/I product
