Please note: The figures are presented in millions of Euros, unless otherwise stated. Due to rounding, numbers presented may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

- 1_ Presents the portion of shareholders' net income before non-operating market movements and before amortization of intangible assets from business combinations (including any related income tax effects).
- 2_ Calculated by dividing the respective period's shareholders' core net income, adjusted for net financial charges related to undated subordinated bonds classified as shareholders' equity, by the weighted average number of shares outstanding (basic core EPS).
- 3_ Represents the annualized ratio of shareholders' core net income to the average shareholders' equity at the beginning and at the end of the period. Shareholders' core net income is adjusted for net financial charges related to undated subordinated bonds classified as shareholders' equity. From the average shareholders' equity, undated subordinated bonds classified as shareholders' equity, unrealized gains and losses from insurance contracts and other unrealized gains and losses are excluded. Annualized figures are not a forecast for full year numbers. For 6M 2025, the core return on equity for the respective full year is shown.
- 4_ Excluding non-controlling interests.
- 5_ Risk capital figures are group diversified at 99.5% confidence level. Solvency II capitalization ratio is based on quarterly dividend accrual; additional accrual to reflect FY dividend would impact solvency II capitalization ratio by -7%-p as of 30 June 2026.
