Quarterly results overview (EUR mn)

Quarterly results

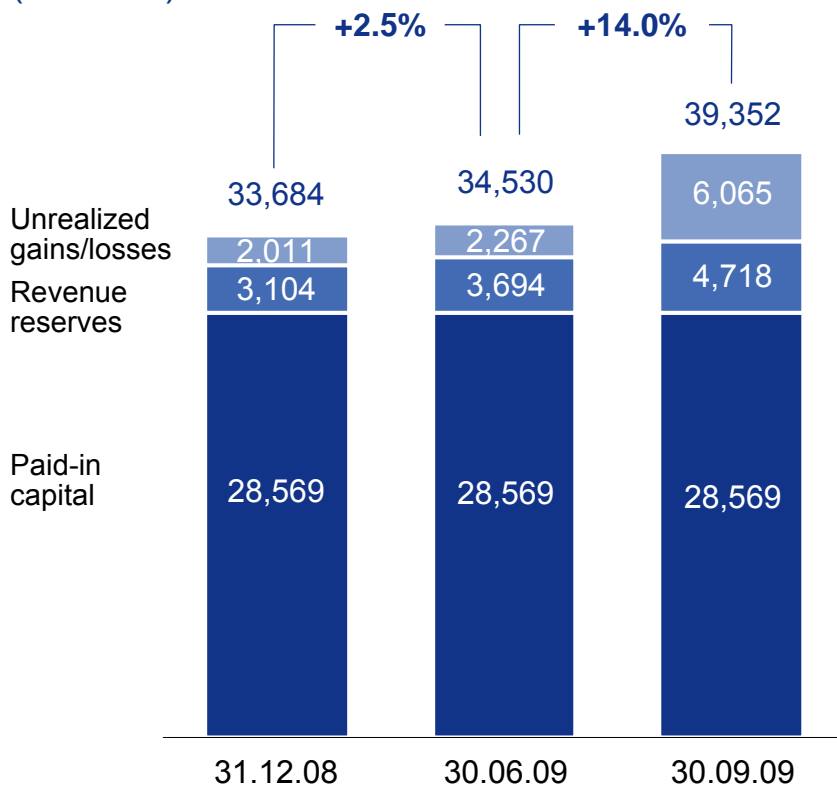

1) Operating profit is a measure which we believe highlights the underlying profitability of our operations. For a description of how we measure operating profit and a reconciliation to profit before taxes and minorities, see section "Additional information" (page 41)

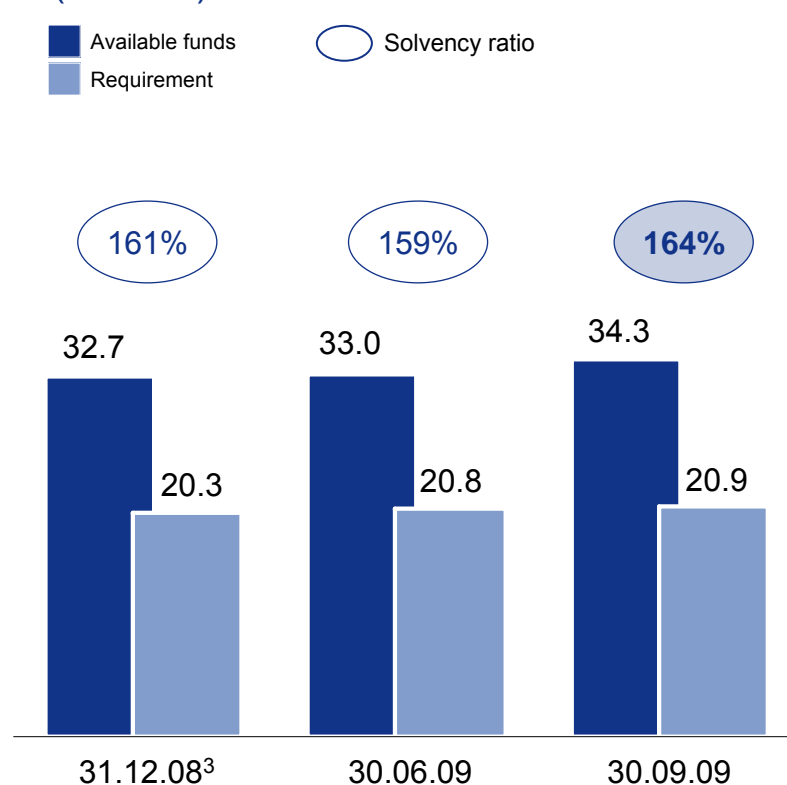

2) Mark-to-market changes in group equity incentives reclassified from administrative expenses to trading. Prior periods have been retrospectively adjusted

Solvency remains strong at 164%

Shareholders' equity¹ (EUR mn)

Conglomerate solvency² (EUR bn)

Impact on IFRS equity

Estimation in EUR bn

1) Credit loss / migration: scenario based on probabilities of default in 1932, migrations adjusted to mimic recession and assumed recovery rate of 30%
 2) Credit spread: 100bps increase in the credit spreads across all rating classes
 3) New business: new non-recurring business volume increases by 50% which leads to an additional reserve requirement

4) MiniCat: loss due to MiniCat events, both natural and man-made, leading to claims of EUR 1.5bn. Applies to P/C business only
 5) After derivatives

Operating profit

Operating profit drivers¹

1) The objective of the Life/Health operating profit driver analysis is to explain movements in IFRS results by analyzing underlying drivers on a L/H segment consolidated basis. Technical result: technical result comprises risk result (difference between total risk premiums and benefits in excess of reserves net of policyholder participation), lapse result (sum of "surrender charges" assessed and "commission claw-backs" minus deferred acquisition cost written off on lapsed policies net of policyholder participation), reinsurance result and other result. Investment result: investment result is defined as the difference between IFRS investment income net of expenses and interest credited to IFRS reserves plus policyholder dividends if any. Expense result: expense result is the difference between expense charges assessed to policyholders and actual expenses minus regular changes in deferred acquisition costs net of policyholder participation

2) Increase stems mainly from a prior year adjustment of EUR -86mn in 3Q 08 and the introduction of a new expense loading methodology at AZ Life in 2009 (EUR +54mn)

3) Profit driver split for 3Q 08 retrospectively revised for enlarged number of operating entities now included in the analysis

We evaluate the results of our Property-Casualty, Life/Health, Financial Services and Corporate segments using a financial performance measure we refer to herein as “operating profit”. We define our segment operating profit as income before income taxes and minority interests in earnings, excluding, as applicable for each respective segment, all or some of the following items: income from financial assets and liabilities held for trading (net), realized gains/losses (net), income from fully consolidated private equity inv. (net), impairments of investments (net), amortization of intangible assets, acquisition-related expenses and restructuring charges. While these excluded items are significant components in understanding and assessing our consolidated financial performance, we believe that the presentation of operating results enhances the understanding and comparability of the performance of our segments by highlighting net income attributable to ongoing segment operations and the underlying profitability of our businesses. For example, we believe that trends in the underlying profitability of our segments can be more clearly identified without the fluctuating effects of the realized gains/losses or impairments of investments, as these are largely dependent on market cycles or issuer specific events over which we have little or no control, and can and do vary, sometimes materially, across periods. Further, the timing of sales that would result in such gains or losses is largely at our discretion. Operating profit is not a substitute for income before income taxes and minority interests in earnings or net income as determined in accordance with International Financial Reporting Standards (or “IFRS”). Our definition of operating profit may differ from similar measures used by other companies, and may change over time
